A 24-year-old female presents to establish care in your clinic for genital herpes problems. She has had 2 lifetime sexual partners, and is in a monogamous relationship. She is also healthy. She has no history of genital ulcers or symptomatic genital herpes infection.

Which of the following is recommended for screening for genital herpes?

- Routine screening with type-specific serologies as part of medical care.
- Routine screening with plasma HSV PCR for all patients as part of medical care.

National STD Curriculum

www.std.uw.edu

The National STD Curriculum addresses the epidemiology, pathogenesis, clinical manifestations, diagnosis, management, and prevention of STDs and features:

- Seven Self-Study Modules
- Twelve Question Bank topics with 100+ interactive board-review style questions
- Modular learning in any order with individual progress tracker
- Group registration and tracking for staff, students, and health care organizations

Funded by a grant from the U.S. Centers for Disease Control and Prevention (CDC) and developed by the University of Washington STD Prevention Training Center and the University of Washington.

UNIVERSITY of
WASHINGTON

Free CME and CNE credits are offered throughout the site.
