

Drugs 101 Series

REGISTER!

November 8th and November 16th

These 2 -hour online trainings focus on basic knowledge about different kinds of opioids and stimulants. We will review basic information about how and why they are used and discuss ways to reduce the harms of using these types of drugs. The trainings will provide an overview of how to engage program participants/clients in conversations around the way they are using these drugs and what potential harms can be reduced by exploring with training participants how to use harm reduction methods to engage with people who use drugs and better understand their experience.

Monday November 8TH
1PM-3PM Pacific Time

DRUGS 101-OPIOIDS

Register here:
